AN INTERESTING TIE.

Of a tie vote between two candidates in White Pine, the Eiko Independent says:

There is a tie between two candidates for the Assembly in White Pine county. The tie is not between strange as it may seem, between two Democrats. White Pine it seems elects four Assemblymen, and it votes than these two Democratic candment. didates who are tied and therefore only one of them can be elected. The law provides that in the case of a tie a new election shall be held for the office on which the tie occurs, which election is not confined to the two original candidates, but is open to oration known for the healing of the anybody who may choose to run flesh. Rendering the skinsoft, white There is one way in which a new election could in all probability be avoided and that is by a recount of all the votes cast, but as there is no law for doing this in case of a tie, it could only be done by consent of all interested parties. The new law for a recount where a majority is not greater than ten does not apply in the case of a tie, but it is a defect in the law that it was not framed so as to include a case of that kind, and it should be so amended at the coming session of the Legislature.

A MAGNIFICENT ORE BODY.

The Euroka Leader tells of something grand out there, eaving:

The recently discovered ore body, at the Richmond mine, is developing magnificently, and is by all odds the largest in extent, and better yet, the higgest grade deposits, ever found within the boundaries of the pro-perty. An upraise from the lifth level has already penetrated it 85 feet. while the winze going down is in ore to the bottom, a distance of 20 feet Crosscuts prove that it will rival, laterally, its perpendicular propor-tions, and that its extent exceeds all former developments. The outlook of the mine is very griffying to the company, and also to Eureka, which will participate in the benefits resulting from all the extractions of the bonanza. Such a body of ore as is now uncovered at the Richmond, would create a farore, if located on the Comstock, that would place the Sierra Nevada excitement in the shade. Ruby Hill in the magnitude of its ore deposits, and wealth of its recourses, excels any other known mining locality in the world.

BELMONT.

The Austin Reveille gives the fol-

A gentleman, recently in from Belmont, gives a very cheerful account of the mining and business outlook in that section. " He reports the Bermont Company as having a large quantity of ore at the mill, which he thinks will yield well, and that he understood there is enough paying ore in slight in the mine to keep the mill raping for several months. The Highbridge Company's mill is fast nearing completion, and will shortly start with twenty-five stamps. From the same source we also learn that the Jefferson mine is promising well, and that sufficient ore is being ex tracted to keep the mill running steadily. Altogether, that section of Nye county has a healthy outlook for all those who have so tenaciously stuck by their old localities in which they have had so much confidence. Having struggled for three years down there in assisting to develop the resources of that country, the writer feels an interest in common with that people in a return of good timee.
